

1981 Ducati Pantah 500 SL Purchased in Cochrane, AB one cold and wet fall day in 1987. I am the third owner. All original and not restored with 33,000 kms. Longer wheelbase and taut suspension combine for a very stable high speed ride.

Powered by a smooth 497cc - 90 degree 4 stroke V twin, with belt driven Desmodromic valve actuation.

The following period improvements have been added to this motorcycle:

- braided front brake lines
- dog leg levers
- K & N air filters
- BUB exhausts (tail only)
- Ohlin rear shocks
