In 1972 I bought and rode my Triumph for 5 years as a chopper. The bike originally was a 6t but alot of up grades were done already. I moved from the okanagan to the kootenays in 1978 and both triumphs lived in boxes til 2003 when those tv bike shows got me motivated. I finished the chopper first then did the other Triumph stock. i finished it as a tr6 because the bathtub fenders were long gone [young and stupid] and i like the idea of only one carb[easier tuning]
